

The Player Search System

The Player Search System (PSS) enables you to find other players who are playing a *Pokémon™ X* or *Pokémon™ Y* game at the same time you are, so you can play together. Local wireless connects you to nearby players, while your wireless Internet connection lets you see players from around the world.

Friends

Displays players registered on your Nintendo 3DS system's friend list.

Acquaintances

Displays players who are not registered on your Nintendo 3DS system's friend list, but with whom you have traded or battled at least once.

Passersby

Displays players who do not belong to either of the previous categories.

PSS Menu

Tap this icon to access the menu for features like the GTS or Battle Spot.

Changing Connectivity

You can switch between using local wireless and your Internet connection.

Tapping these small icons will open the same screens that can be accessed from the field menu (see the electronic manual).

Note: Players who are not available are shown in gray.

Playing with Other Players

Tap the icon of a player being displayed on the PSS screen to trade or battle with that player.

In order to use Internet communication, you must first set up your system for Internet connectivity. Please refer to your Operations Manual for details.

⚠️ WARNING - 3D FEATURE ONLY FOR CHILDREN 7 AND OVER

Viewing of 3D images by children 6 and under may cause vision damage. Use the Parental Control feature to restrict the display of 3D images for children 6 and under. See the Parental Controls section in the Nintendo 3DS Operations Manual for more information.

⚠️ WARNING - SEIZURES

- Some people (about 1 in 4000) may have seizures or blackouts triggered by light flashes or patterns, and this may occur while they are watching TV or playing video games, even if they have never had a seizure before.
- Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult a doctor before playing a video game. Parents should watch their children play video games. Stop playing and consult a doctor if you or your child has any of the following symptoms:

Convulsions Eye or muscle twitching Loss of awareness Altered vision Involuntary movements Disorientation

To reduce the likelihood of a seizure when playing video games:

1. Sit or stand as far from the screen as possible.
2. Play video games on the smallest available television screen.
3. Do not play if you are tired or need sleep.
4. Play in a well-lit room.
5. Take a 10 to 15 minute break every hour.

⚠️ WARNING - EYESTRAIN AND MOTION SICKNESS

Playing video games can result in eyestrain after a sustained period of time, and perhaps sooner if using the 3D feature. Playing video games can also result in motion sickness in some players. Follow these instructions to help avoid eyestrain, dizziness, or nausea:

- Avoid excessive play. It is recommended that parents monitor their children for appropriate play.
- Take a 10 to 15 minute break every hour, or every half hour when using the 3D feature, even if you don't think you need it. Each person is different, so take more frequent and longer breaks if you feel discomfort.
- If your eyes become tired or sore while playing, or if you feel dizzy or nauseated, stop and rest for several hours before playing again.
- If you continue to have any of the above symptoms, stop playing and see a doctor.

⚠️ WARNING - REPETITIVE MOTION INJURIES

Playing video games can make your muscles, joints, or skin hurt. Follow these instructions to avoid problems such as tendinitis, carpal tunnel syndrome or skin irritation:

- Avoid excessive play. Parents should monitor their children for appropriate play.
- Take a 10 to 15 minute break every hour, even if you don't think you need it.
- When using the stylus, you do not need to grip it tightly or press it hard against the screen. Doing so may cause fatigue or discomfort.
- If your hands, wrists, or arms become tired or sore while playing, or if you feel symptoms such as tingling, numbness, burning or stiffness, stop and rest for several hours before playing again.
- If you continue to have any of the above symptoms or other discomfort during or after play, stop playing and see a doctor.
